DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Example one, Claim 1; lines 1-3, a common carrier apparatus to which portable terminals are connected through a wireless communication network and an information server apparatus is linked via a network. The idiomatic errors render this limitation confusing, as it is unclear how the apparatus is connected.

Example two: claim 1; lines 24-26, if said information acquisition request or said information transferred from said information server apparatus has the specified payer. The idiomatic errors render this limitation confusing, as it is unclear how the information acquisition request or said information transferred from said information server apparatus can have a payer.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3627

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-15, as best interpreted by the Examiner are rejected under 35 U.S.C. 102(e) as being anticipated by Jansen et al.

Jansen et al. teaches a pay-per use for data-network-based public access services. Specifically, Jansen et al. teaches in Figure 1, a central server (26)(common carrier apparatus) which connects portable/wireless terminals (36) (portable terminals) with the Internet (40) (information server apparatus). The central server includes: database (62) with billing records (accounting information database and payer information database), a transaction server (50)(accounting server apparatus/payer processing apparatus) and an internet gateway (44) (gateway server apparatus). The system of Jansen et al. further contains a file server (48) with configuration and content files for interaction with terminals (base station).
